Experience

Product Design, Design systems at Param, Full-time

November 2023 - Present

- Contributing design system, Param mobile app and Param Next.
- Param next is a product that empowers developers and businesses to build applications and services by providing them with access to a wide range of APIs.

Freelance Product Designer

March 2022 - November 2023

- I did a bootcamp and was the only designer for Smartcoach web app. Smartcoach is a web-app that designed to assist amateur football coaches in Switzerland with scheduling and managing practices and matches.
- I also helped [Norma](#) to make their landing page responsive.
- Crafted a mobile specified navigation.

UX/UI Designer at Greatr, Contract

June - September 2021 (3 Months)

Greatr is organizing events and listing internships for exchange students in the US. Our goal was to help exchange students for searching events near them and finding an internship to build their career abroad.

- Crafted "for you" section on the home page. Users would reach out to new things according to their preferences or standard home page.
